
a
Read depth, DAOTDT01 (SRR5007146); grey bands: the two copies of the internal repeat
Read depth (1-kb windows)
all alignments
unique alignments (MAPQ ≥ 20)
b
Solid: observed in each MAG's own reads; dotted: expected from simulated library pairs
Unique pairs spanning each window boundary
DAOTDT01 (SRR5007146)
DAOPMG01 (SRR5007150)
DAOOUB01 (SRR4244739)
Position in the coding sequence (kb from the start codon)
c
Around the repeat; ×: boundary inside a copy (expected 0, observed 0)
copy A
copy B
Unique spanning pairs
CDS position (kb)
d
Shared 30-mers (diagonal = self); repeat 10,362 bp apart
CDS position (kb)
CDS position (kb)
